What happens if you don't seek treatment? Dive Master and Ph.Md John Doe
vere DCS, a permanent residual handicap may be the result: this can
dysfunction - usually very embarrassing, sexual dysfunction or
weakness, to name a but few. In some instances of neurological DCS,
e permanent damage to the spinal cord, which may or may not
oms. However, this type of damage may decrease the likelihood of
m a subsequent bout of DCS. Untreated joint pains that subside are
ause small areas of bone damage called osteonecrosis. Usually this
ill not cause symptoms unless there are many bouts of untreated DCS. If this
happens, however, there may be enough damage to cause the bone to become
brittle or for joints to collapse or become arthritic." (Doe, 2011).

In severe DCS, a permanent residual handicap may be the result: this can be a bladder dysfunction (very embarrassing), sexual dysfunction or muscular weakness, to name a but few. In some instances of neurological DCS, there may be permanent damage to the spinal cord, which may or may not cause symptoms. However, this type of damage may decrease the likelihood of recovery from a subsequent bout of DCS. Untreated joint pains that subside are thought to cause small areas of bone damage called osteonecrosis. Usually this will not cause symptoms unless there are many bouts of untreated DCS. If this happens, however, there may be enough damage to cause the bone to become brittle or for joints to collapse or become arthritic.

The diver may complain of vertigo or headache, unusual fatigue or tiredness. He or she may have a rash, pain in one or more joints, muscular weakness or tingling in the arms or legs or paralysis. Less often; shock, difficulties with breathing, unconsciousness or death may be seen. The symptoms generally appear in a relatively short period after completing the dive. Almost 50 per cent of divers develop symptoms within the first hour after the dive, 90 per cent within six hours and 98 per cent within the first 24 hours. (5) In practice this means symptoms that appear more than 24 hours after the dive are probably not decompression sickness. An exception is if the diver has travelled in an aircraft or has been travelling in the mountains. Under these circumstances, low pressure can still trigger decompression sickness more than 24 hours after the last dive. As a result, it is wise not to fly within 24 hours of a deep dive. ere a German Messerschmitt plane crashed during the Battle of Crete during World War II in 1941(3) has been recently granted.

STUDENT'S ASSIGNMENT

INCLUDE IN R

Now, however, it is not really free access to the kingdom of heaven that is controlled and checked very hard by the Greek authorities and their forces, although the situation is beginning to improve.

John D. Ives, PhD Hist. at Cornell summarizes in Modern Aquatic Diving and Other Naval Gazing 2012 (2) (trans.) The reduced protectionism in the Mediterranean "Just over seven years ago, the Greek authorities finally lifted their firm ban of SCUBA diving. Their strict approach was based, wisely so, on the fact that there are archaeological treasures basically everywhere in the Aegean seas. Now they have given some authorized diving center permission to dive on a few selected sites. Diving Center Crete and Adventure Blue are the two most famous dive centers in the area." One of the dive sites is located off the island of Thodorou where permission to dive in an area where a German Messerschmitt plane crashed during the Battle of Crete during World War II in 1941(3) has been recently granted.

The dangers of Diving

The Greek archipelago, this nautical Eden unobstructed visibility. In principle shark fr from the Phoenician, Egyptian, Greek and renowned free diver and poet Geoffrey va kingdom of heaven, but it is one that is co although the situation is beginning to imp

John D. Ives, PhD Hist. at Cornell summarizes in Modern Aquatic Archeology And Other Naval Gazing 2012 (2) (trans.) The reduced protectionism around the Mediterranean "Just over seven years ago, the Greek authorities finally easing up on their firm ban of SCUBA diving. Their strict approach was based, wisely so, on the fact that there are archaeological treasures basically everywhere in the Aegean seas. Now they have given some authorized diving center permission to dive on a few selected sites. Diving Center Crete and Adventure Blue are the two most famous dive centers in the area. "

One of the dive sites is located off the island of Thodorou where permission to dive in an area where a German Messerschmitt plane crashed during the Battle of Crete during World War II in 1941(3) has been recently granted.

Although planes from WWII could be considered ancient by some so do not feel the Greek authorities that there is any immediate danger to the Greek cultural treasures for scuba divers visiting that particular site. It has namely made sure to clear the area of every single gadget of archaeological value before being released until the grasshoppers. It is unfortunately the case that, too often, if not almost always, or perhaps even always, picked souvenirs from the seabed, be it from wrecks or sunken columns and dropped fishing lines. It is also why this ban on scuba diving has been in place for so long. It is said that Jaque Yves Cousteau was immediately ported from Athens Underwater Archaeology Museum after they realized the consequences of his and Gagnan's invention of the "aqua lung" would it become adopted by a the general populace. The Greek archipelago, this nautical Eden for the world divers. Clear water with meters and meters of the free and unobstructed visibility. In principle shark free and a Lego box of undiscovered treasures and sunken cities and lower ships from the Phoenician, Egyptian, Greek and Roman times. A "paradise that was lost but now at last recovered" by the renowned free diver and poet Geoffrey van Spladoosh once put it. (1) Now, however, it is not really free access to the kingdom of heaven, but it is one that is controlled and checked very hard by the Greek authorities and its naval forces, although the situation is beginning to improve.
